**CONTROL YOUR HOME
WITH THE NEW
TOUCHSCREEN KEYPADS**

Touchscreen keypads with capacitive technology

Android T1

Quad core Cortex A55

RJ45 with POE

WiFi

Bluetooth 5.2

RS485 Connection

T8 & T10

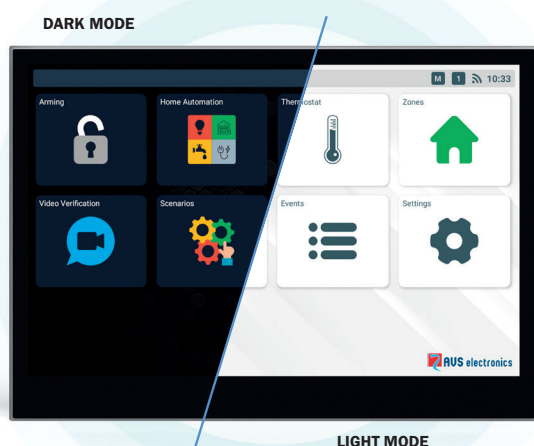

Latest generation keypads with capacitive Touchscreen

The new AVS touchscreen keypads, available in **8" and 10" screen sizes**. With the **latest generation capacitive technology**, they can be used to **manage AVS multifunctional control panels**.

T8 and T10 allow the management of all **Intrusion Detection, Video Alarm Verification, Video Intercom** on SIP protocol, **Intercom function** and **Live view** of cameras connected to the network. A section dedicated to Smart Home Automation allows the total management of the home, such as **control of lights, motorized controls, irrigation** or **electrical loads control** to optimize electrical consumption.

The keypads **communicate with the control panels** through the proprietary My AVS Alarm Cloud, via TCP-IP protocol, in LAN network, Wi-Fi.

The RS485 BUS line ensures system management even in the absence of an internet network, guaranteeing essential functions.

Interface

Simple and intuitive graphic interface

It reflects MyAVSAlarm mobile application, offering the end user the same experience in managing the system.

Full temperature control

The 'Thermostat' menu allows the user to control the room temperature, automating the control devices of the boiler, air conditioning and ventilation, thus improving room comfort.

Light or dark mode

The user has the possibility of setting on the keypad the white or black skin, to adapt to different contexts.

Installation

On wall and on junction boxes

The keypad is designed for mounting on DIN 503 boxes or round boxes with 60 mm pitch.

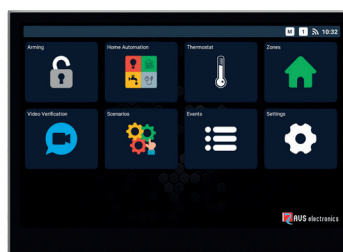

The spacer, available as an optional accessory, allows wall installation with three different sizes/depths.

Power supply

The keypads can be powered either in 12-24 Vdc or in POE (Power over Ethernet).

T10

FUNCTIONS

	BASIC	PREMIUM*
Screensaver with photo album display	✓	✓
Zone management with total and partial ON and display of associated zone status	✓	✓
Zone management with inclusion and exclusion and status display	✓	✓
Home automation with management of associated home automation devices	✓	✓
Control and management of electrical loads (with MD modules) and statistical analysis of daily consumption	✓	✓
Thermostat function with setting of weekly time slots	✓	✓
Event memory consultation	✓	✓
Consultation of system diagnostics	✓	✓
Home page customization with display setting (Light or Dark)	✓	✓
Display of real-time images from surveillance cameras paired with ONVIF, MJPEG, RTSP or from integrated video surveillance systems**	✓	✓
Interactive graphic maps with zone recall and system management buttons	✓	✓
Local intercom between networked touch keypads	✓	✓
Emergency keypad emulation if connected via RS485 Bus	✓	✓
Remote intercom function between touch keypads and mobile devices via MyAVSAlarm App	✓	✓
Video door phone function with outdoor/indoor video door phone stations connected with SIP protocol	–	✓
Remote video door phone function with MyAVSAlarm App	–	✓
Local and remote video answering machine via MyAVSAlarm App	–	✓
